 **FANATIC**

FANATIC 2020

WELCOME TO THE NEW SEASON

THOMAS OSCHWALD

ARTHUR ARUTKIN, SKY SOLBACH

CRAIG GERTENBACH
Brand Manager

The continued growth of SUP – as a sport and a lifestyle – should really not come as a surprise.

It is by far the easiest to access watersport of all time, with a broad range of users varying from professional wave riders, downwind racers & long distance record breakers; all the way through to yoga & fitness enthusiasts, or families & kids just having fun at the beach or lake.

All of this – from just a board and a paddle in their hands – it is true simplicity with maximum enjoyment.

I am really pleased with the great feedback and success of our Composite SUP collection. Our reputation for quality, consistency – and focusing on a lower number of models to complete the range – has led to a growing number of happy customers.

Our new foilboards are mixing things up on the water – and the new crossover sport of Wing Foiling is already making a real impression this season – further increasing the number of people getting away from their daily routines and engaging with nature.

Our Inflatable collection also continues to bring newcomers to the sport, providing great access / usability / transport friendly solutions.

It goes without saying that performance is built as default into every one of our products, yet our motivation comes from building boards that will allow you to enjoy the stoke and progress in our wonderful sport, no matter what level you are at.

So, wherever you find yourself on the water this season, I hope you enjoy the 2020 range!

WE ARE FANATIC

WE ARE FANATIC

Founded in 1981, our brand represents over three decades of history and an ongoing promise to you: to deliver quality, innovation and service. Our reputation as one of the world's leading watersports brands has been built upon a resolute passion for the products we produce. Only the very best will do.

WHAT WE STAND FOR

Fanatic is driven by our unwavering desire to create dream boards.

That vision may sound simple, but achieving it is not. We stand for everything that makes it possible: quality, innovation, knowledge, experience, consistency, integrity, Ocean Minded spirit and above all else, passion.

2 0 2 0

COMPOSITES

We made many refinements throughout the composite range, in our never-ending quest to increase performance and deliver boards that will exceed your expectations.

Our exciting foil ranges have evolved again with features to boost performance in steeper waves, while maintaining their ease of paddling to catch and ride even the smallest swells. The Sky SUP is also ideal for learning to Wing Foil.

By reducing overall widths we have made significant improvements to the top speed and efficiency in our Falcon, Blitz and Ray – yet thanks to a blend of many other subtle changes – stability and ease of use are not compromised.

INFLATABLES

Stand Up Paddleboarding has now become more accessible and even easier to store and transport, thanks to our big inflatable range and new bags.

We introduce a new 13'6" Ray Air Touring Premium, for the larger adventurers or those who want to carry more luggage or supplies.

We developed the new 9'6" Rapid Air with R&D input from legendary white-water SUP paddler Dan Gavere

Keeping it big, our new Fly Air XL replaces both previous models with a more efficient shape that can accommodate up to 7 adults – for the ultimate board meeting!

And talking of friends and efficiency, the new more handy Fly Air Fit Platform S is designed to connect groups of up to 10 boards in smaller pools for SUP fitness or yoga sessions.

M E E T T H E T E A M

CRAIG GERTENBACH

Brand Manager

As Brand Manager for Fanatic, Craig divides his time between testing, sales, team management and boardbag packer at photoshoots. South African born and bred he took up Windsurfing back in 1982, joining Fanatic as a rider and World Tour competitor in 1995.

KARIN GERTENBACH

Head of Marketing

Karin is the Head of Marketing for Fanatic. Having joined the brand back in 1999, she has evolved and worked hard to grow its image as much as she can. Married to Brand Manager Craig, and with two kids who love to SUP too, she lives the job 24/7 and is truly 'Addicted to Ride!'

KLAAS VOGET

Marketing Manager

Top 10 PWA competitor and SUP soulrider Klaas Voget, spends as much time as possible on the water. Having signed his first rider contract with Fanatic back in 1999, he got involved in the R&D in 2005. In 2007, Klaas became a full time pro rider dedicating his passion for Windsurfing and SUP to the brand and in 2015 he became Marketing Manager.

DANIEL AEERLI

Product Manager

Dani Aeberli has been 'Addicted to Ride' since he was 7 years old. As Fanatic's Product Manager, Daniel pursued his love of watersports by getting involved in the R&D and technical development of Windsurfing with Fanatic. Now, Stand Up Paddling and the creation of new products have become another passion of his, absorbed into his work and lifestyle.

STEFANIE GSENGER

Sales Manager

An avid outdoor sports enthusiast, Stefanie has risen through the ranks of Customer Service, right up to Sales Manager. Her energetic and organised character perfectly balances the rest of the team, to ensure products are delivered on time with the best service you'd expect from a market leader!

VASIN SIRITHO

Product Engineer

Vasin Siritho is a passionate waterman with years of experience in the composite industry. He is the key link between our R&D / Product Management teams and our suppliers, making sure the great products we test year round, end up in the hands of our customers!

SHAPED BY

Sky Solbach

Sky joined the Boards & More family in 2004 as a team rider and enjoyed a successful competitive career that spanned over 15 years. During that time, Sky became deeply involved in building and developing surfboards, kites, hydrofoils and SUPs – Some of the best sold kites and boards in the market over the past ten years are a direct result of his work in R&D. Sky attributes his ability to test gear at the highest performance levels together with other world-class riders as the key to his success as a designer and thus continues to push his riding level across a wide range of water sports. Sky develops boards and hydrofoils on his custom-built CNC machine just a stone's throw away from the world-class testing grounds of Maui's north shore.

DEVELOPED BY
KEN WINNER

Ken Winner

Ken Winner started with Windsurfing in the seventies, winning national and world championships in various Windsurfing disciplines. After dabbling briefly with Kiteboarding in the eighties, he jumped into the sport with both feet in the late nineties. He helped start the involvement of Boards & More with Kiteboarding and has been designing kiteboard-related equipment for the last 19 years. His expertise in watersports expanded deeply into Foiling over the recent years. His latest design efforts include developing the sport of Wing Foiling. Ken is developing the Fanatic Foiling programme for all disciplines together with Sky Solbach.

FANATIC INFLATABLES

NEW FOR
2020**RAY AIR PREMIUM 13'6"**

Highly requested by our dealers and rental schools, we introduce a new larger 13'6" inflatable touring board. Its high volume is ideal for both bigger riders, and those looking to do longer tours with more baggage on board.

CLICK FIN SYSTEM

For even more convenience and faster set up – all of our Premium boards now feature Click Fins – to be fitted and removed in seconds, without tools, whilst still using the standard US Box system. The Rapid Air 9'6" comes with quad Click Fins to adapt the board for really shallow waters.

**FLY AIR FIT PLATFORM S**

A new more compact version of the Fly Air Fit Platform, which is specifically designed to fit into smaller pools, and be more portable and easier to transport. Yet – despite its smaller size – it can still connect with up to 10 boards in total; making it ideal for fitness and yoga enthusiasts who may change locations frequently or are limited by space.

**RAPID AIR 9'6"**

We developed the new 9'6" Rapid Air with R&D input from legendary white-water SUP paddler Dan Gavere. The outline was redefined, and combined with a special scoop rocker line featuring more nose and tail lift to effortlessly absorb waves and rapids. A full-size diamond deck pad offers better grip; while 4 × Click Fins offer quick fitting and removal, and directional stability without catching.

FLY AIR / RAY AIR

All sizes of our bestselling Fly Air and Ray Air lines are now available in our affordable Pure technology and the stiff, high quality Premium construction.

FANATIC COMPOSITES

NEW FOR
2020

SKY SURF

As Surf Foiling evolves, so too does the next generation of our dedicated foil surfboard. A more curved 'surfier' outline with increased rocker and a kick-tail make for easier take-offs and reduces drag in steeper waves; while bevelled rails and a pulled in nose with deep double concaves makes touch-downs more neutral and forgiving. The new 5'11" size is perfect for both prone surf beginners and advanced Wing Foilers.

SKY SUP

The Sky SUP is (also) more performance orientated, and just like the Sky Surf, it is now even easier to catch even the smallest waves or rolling swells. Higher rocker stops the nose from sticking and frees it up when paddling into steeper waves – as does the step-tail – which also maintains volume for paddling but reduces length for quicker release. All sizes are perfect for learning Wing Foiling. The 6'11" size is also available as a cross over SUP / WS mast track edition. All Sky SUP's have optional footstrap inserts and are supplied with 2 footstraps.

ALLWAVE

Thicker overall volumes, a slightly more rolled deck and thinner rails – combined with a narrower straighter outline – helps stability while paddling, and also increases acceleration and hold on the wave. The single concave to vee bottom shape adds drive – especially when on the front foot – and a winger tail increases manoeuvrability; helping it feel more agile, sporty, and smaller underfoot.

STYLEMASTER

One length, two widths fits into the classic 10'0" longboard style and official SUP longboard class. A new rocker line makes the Stylemaster ride much smoother and faster on the wave, with a very smooth transition and gradual increase in turn-ability when stepping back. A flatter deck shape makes it better to stand on and more stable, and thanks to a new rail profile, it is more forgiving when nose-riding.

FALCON

Slightly narrower overall, the Falcon gets a straighter outline which increases top-speed on flat water. The rocker line has been altered to further help catch small waves and maintain higher speed gliding; while significant changes to the deck shape and volume distribution in the nose and tail, help to increase control and avoid catching or nose-diving during down-winders.

RAY /
DIAMOND TOURING

The Ray and Diamond Touring benefit from the development of our raceboards, now featuring a narrower width combined with a highly efficient rocker line based on the Strike. More stable in the waterline with a slightly recessed deck, this shape tracks perfectly in both flat water and chop. One shape (12'6" x 28.5") is available in two construction options to suit all riders and budgets.

BLITZ

The 2020 Blitz has been made even better for all-round conditions, by reducing the width without losing stability. Speed and acceleration are increased by a straighter outline in front of the rider, while a pointier nose and rounder bottom shape further help control in choppy conditions or during drafting. Meanwhile, a slightly wider tail gives increased stability during turns and while stepping back during downwind runs.

ocean minded

14

OUR OCEAN MINDED SPIRIT IS THE DRIVING FORCE BEHIND OUR PASSION TO CREATE AND INNOVATE. COMPLEMENTED BY OUR ETHOS OF 'PROTECTING WHAT YOU LOVE,' WE CELEBRATE THE CHALLENGES WE FACE EACH DAY TO COME UP WITH NEW WAYS TO COMBINE BOTH.

Acknowledging the part we play in creating a cleaner, greener environment we work hard to source ethical and raw materials to utilise in the production, packaging and distribution of our products.

Our Fly Eco Edition boards – available in 9'6" & 10'6" lengths – are a premium product with a unique layup of Flax, Cork and Wood – and show that we are already one step closer to accomplishing an eco-friendly future.

keep it green

Green is the prime colour of nature and we intend to do everything we can to keep it that way. As we evolve our brand and create new products, our primary goal is to reduce the ecological impact on the environment by using ethically sourced materials. Each year significant gains are made, from using ozone-free foam cores and coloured resins vs spray paints, through to smart packaging and audited facilities. We embrace the challenges ahead and our Fly Eco Edition is a huge step in the right direction.

THE BOARD WITH THE ECO FRIENDLIEST MATERIALS

Eco friendly Flax / Cork and Wood Veneer layup with FSC sourced wood from sustainable forestry

Built entirely without oil based PVC

Uses Sicomin's GreenPoxy® Bio Resin to coat and laminate

PRODUCT MANAGER DANIEL AEBERLI ABOUT THE FLY ECO:

"The Fly Eco is at the forefront of many, many steps already happening behind the scenes at Fanatic on our sustainability program. It represents a significant move in the right direction, and was achieved by looking at things in an entirely different way. Rather than taking a performance construction and trying to make it more eco-friendly, we went the whole distance and started with an eco-friendly construction and then developed its performance.

The internal component of the Gecko Eco is made of closed cell ozone free EPS blanks. We then add a layer of cork instead of PVC onto the deck, and as an alternative to Carbon fibre: Flax fibres are woven together to create a mesh material, which is then laid over the cork – giving the fine finish that can be seen on the deck of the board. For the base we've replaced PVC with an FSC certified wood veneer, sourced from responsible forestry. This veneer is what gives the Fly Eco its visually striking natural matt finish. The entire board is coated and laminated using sustainable Bio Resin, a product we're using throughout the entire Fanatic range."

Fanatic x Environment

AS STAND UP PADDLEBOARDERS AND SURFERS,
WE ARE ACUTELY AWARE THAT ENVIRONMENTAL POLLUTION
IS A HUGE PROBLEM ALL OVER THE WORLD –
AND IN PARTICULAR FROM SINGLE USE PLASTICS THAT
END UP IN OUR WATERWAYS AND OCEANS.

THAT'S WHY WE ARE WORKING TOGETHER WITH SEVERAL
ENVIRONMENTAL ACTIVISTS / ORGANISATIONS.

ZERO EMISSIONS

Michael Walther

Since 2008, Michael is pursuing two goals with his projects. With his extreme adventure tours, he wants to highlight the possibilities of climate-friendly technologies and demonstrate that it is often a matter of will and not of skill when it comes to achieving goals – on both board development and in climate protection. In 2018 Michael was paddling to the edge of the glaciers in Greenland to raise awareness for climate change. He was following “The Great Route” from Aasiaat to Ilulissat to find out more about the life on the rough island in the past and in the present. This trip showed that we have to act, to protect this unique northern region and of course our whole planet, highlighting how radical climate change is already here. In May 2019 he did another project called “Emission-free through Schleswig-Holstein” where he travelled across Germany’s northernmost state via SUP – 700 km.

PLASTIC PATROL

Lizzie Carr

Thankfully, one incredible Stand Up Paddleboarder – Lizzie Carr – is spearheading a global mission to rid the world of plastic pollution, by tackling it from its roots – canals and rivers all over world – intercepting it before it reaches the oceans.

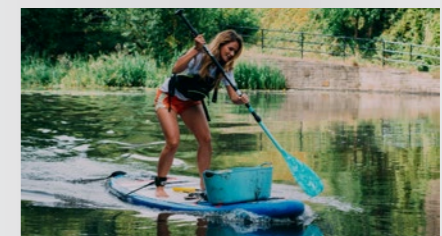

Already a keen adventurer and environmentalist, Lizzie originally got into SUP for fitness, but soon noticed that the waterways around London where she paddled were clogged with plastic waste. Lizzie set up a non-profit organisation that has grown to become a global movement of like-minded people working together on land and water to protect the environment we love.

Plastic Patrol help organise clean-ups all over the world (44 countries and counting), bringing communities together at specified events to identify and collect plastic waste, photograph and log the evidence through the plastic patrol App, before clearing it away.

MORE INFO / DONATION / APP:
WWW.PLASTICPATROL.CO.UK

Fanatic is supporting Plastic Patrol, by providing Fanatic SUP boards for nationwide clean-ups.

PURE WATER FOR GENERATIONS

Pascal Roesler

In 2017 Pascal Roesler, a businessman from Munich, paddled from Munich to the mouth of the Danube into the Black Sea, 2467 km and 63 days on the water with his Falcon Air, about 600 000 paddle strokes in total. He did that all for a good cause – to raise awareness of the need for clean water, essential for our planet's survival. In 2018 he went down the river Salzach, accompanied by our river SUP ambassador Oliver Heldt. The Salzach runs 225 kilometers before flowing into the river Inn. Pascal started his tour from the source near the Salzachgeier to demonstrate how the river changes on its way. In July 2019 he visited several schools in Bavaria to demonstrate awareness towards our water and environment. With 30 Fanatic SUPs, SUPing was a big part of this programme with over 1000 students enjoying the experience and learning more about sustainability and the role they can play in safeguarding our Planet for future generations. In the meantime, Pascal has left his full time employment to dedicate his time and effort to saving the environment with many exciting new projects to come.

STAND UP FOR SAFE WATER

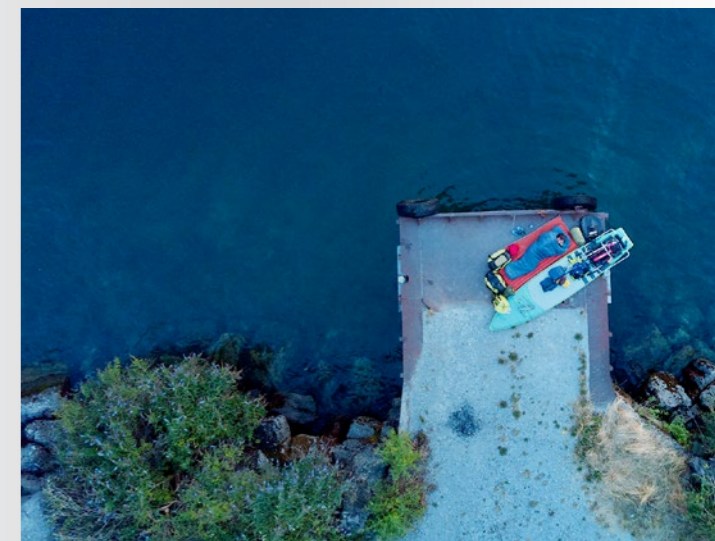

Thomas Oswald

During August and September 2019, SUP adventurer Thomas Oswald from Switzerland paddles from the North Sea up the Rhine to the Tomasee at 2345 meters above sea level. He travels for 3000 kilometers and is on the water for 2 – 3 months. His tour takes him through 6 countries – all for a destination that is actually located only a few kilometers away from his home. On the first 1600 km long stage to the mouth of the Rhine, the adventurer wants to deliberately move away from the clean spring water. In this section, he will experience first-hand what it means when clean drinking water does not simply bubble out of the tap. A water cleansing system for bottled water forces the adventurer to get along with the water that surrounds him. At the same time Thomas Oswald would like to collect money on his tour for people who cannot go the way to clean drinking water.

Thomas has already done several SUP micro expeditions and is always in search of new challenges in sports and everyday life, he keeps pushing his limits. His inner conviction is that it forces him to face all the big and small challenges in life while he breaks out of the everyday rhythm and strides out into new worlds.

26 As the Foiling revolution continues to bring surfing to the next level, our dedicated foil surfboard – the Sky Surf – has also evolved to give you a massive boost in performance, even when riding the smallest waves or ocean swells.

With its compact dimensions, generous volume and channelled bottom shape, it is direct to paddle and tracks easily, making catching waves easier than ever.

A more curved ‘surfier’ outline with increased rocker and a pronounced kick-tail reduce drag further during take-offs, or when carving hard on steeper waves. The bevelled rails and pulled-in nose with deep double concaves makes touch-downs more neutral and forgiving.

The Sky SUP is our 100 % dedicated foil SUP designed to maximise your fun – even in tiny waves – and to give you the longest rides of your life!

Everything about the compact Sky SUP has been optimised to make it as easy as possible to catch waves. The compact dimensions, thick bevelled rails and channel bottom give stability and allow it to paddle straight and free; while the recessed deck and stance give great leverage and control over the foil.

This year we boosted the performance with higher rocker, refined outline with narrower nose, and added a step tail to reduce drag when riding steeper waves and increase efficiency when pumping onto the foil. All sizes are also ideal for Wing Foiling.

**INTERVIEW WITH FANATIC
SHAPER SKY SOLBACH ON
THE NEW FANATIC RANGE**

What are the changes in the new Sky range?

The new boards have evolved quite a bit from last year. They have much more rocker overall and a more pulled in nose outline which helps a lot when taking steep drops as the nose and rail are much less likely to catch. The bottom shape has also changed from a deep single channel to a slightly convex bottom which we found to be more forgiving, faster and easier to break surface tension when lifting off. The deck shape has a more dug out concave shape that helps anchor your feet to the board and give you maximum leverage over the foil. We also have an angled-up step tail that allows the board to fit into a much tighter transition in the wave without catching and allows you to easily angle the board up for early lift-off. The new boards also paddle much faster, so it's easier to catch more waves.

Where and with whom did you do the testing for the Sky SUP range?

I developed the Sky SUP range on Maui over the past year. We have great conditions all year round on Maui for testing foils and foilboards and I am luckily also able to gather great testing feedback from our visiting team riders like Arthur Arutkin, Airton Cozzolino and our USA sales rep and mad dog river paddler Dan Gavere among others.

What are the main design differences between a regular SUP / surfboard and a foilboard?

We aim to make our foilboards as compact as possible while still be easy to paddle, so they are much shorter than a regular board, which has a lot of benefits when you are Foiling. This short length fits in the wave a lot better,

particularly because you are often riding smaller waves on the foil and a short board fits more easily in the tight transition of small waves and gives you more freedom to maneuver within that tight space. A short board also means that you don't need to run up and down the board to position your feet over the foil and makes take offs much simpler. The shorter length makes the board a lot less physical when it comes to pumping to generate lift from the foil. Our SUP foilboards have a 45 degree bevel on the rail which has a couple of functions; It keeps the rail up and out of the water when you are doing a banked Foiling turn. It also creates a sharp point, which gives it a better release when hitting the water and reduces the wetted area resulting in a softer touch down. Because the board is designed to foil, it doesn't need to have all the engineered flex characteristics of a regular planing board but it does need to be stiff and light, which gives a much more responsive and reactive ride underfoot.

Can you describe what it's like to Foil compared with regular SUP or Surfing?

Foiling allows you to ride a really small board on a tiny wave and have tons of fun. It just opens up so many more places and conditions and you simply don't need great conditions anymore to get you really excited to go Surfing! The sensation you get on even the tiniest wave or lump of water is that you have have all the power and speed you could ever want, which is something you only get in really good waves when surfing without a foil. Foiling really does make the undesirable Surfing days seem like the best day ever. >

29

Assuming you can already SUP or surf, how much more difficult is it to learn Foiling?

Once you know how to SUP or surf I think Foiling just adds a new dimension to it. It is a bit different, when you first start dropping into a wave and the board starts rising out of the water. It takes some time to get used to but it opens up a whole new world of possibilities and conditions. Particularly having a lot more fun in smaller waves.

You don't need to have any special strength or fitness. It's mostly about technique and positioning on the board. When you are learning you can play a lot with foot positioning. If you stay forward on the board it holds the board down and as you step further back it encourages the foil to lift, so when you are learning you can stay forward a bit more until you are comfortable enough to step back and let it fly and eventually you will find your sweet spot.

30

Would a good foiler have a quiver of boards for different conditions or is it more about changing the foil?

I would have one Surf foilboard and one SUP foilboard and then simply change the foil. Most people are going to buy these boards for smaller conditions, so one board is definitely going to do the job, but you may want to have a few different wings for different conditions. For example, one for steep waves, one for not such steep waves, one for down-winding or whatever.

In terms of versatility of the SUP foil equipment, do you find there is less need for an extended range of kit when you compared Surfing, Windsurfing, Kiteboarding ...? And if so, does this help concentrate your efforts in R&D?

Basically the way the R&D process works is like this: We are in the water every day and we want to be on the best equipment possible

in all conditions. We design the gear we feel is needed to cover the widest possible range of use so that riders like ourselves will always have the right equipment to have the most fun in any given conditions.

For you, what is the deciding factor between going for a SUP foil session and a surf foil session?

I like to mix it up, but for me it all depends on the spot. I really enjoy the feeling of flying over the water on a small surf board because it's the ultimate feeling of freedom, but the SUP gives me much greater access to a variety of waves that are difficult to prone paddle out to on a small board. The outer reefs on Maui are perfect for Foiling and there's no one around but they are pretty far from shore, so I usually take the SUP when I go there.

How excited are you now that Foiling is sitting comfortably in the mainstream product offerings in the industry, and seems to be accepted and understood by a much broader audience?

We can confidently say now that Foiling is here to stay. Foils have extended the range of existing sports like Windsurfing, Kiteboarding, Surfing and SUPing and has now even sparked new sports like open ocean downwind Foiling and wing foiling. I'm excited to see where we can take it next!

Everyone is talking about Wing Foiling these days – what's Fanatic doing here – and is that part of your Windsurf Foiling division, SUP / Surf Foiling or is that more Kiting?

I've been having a lot of fun Wing Foiling lately and there's a lot of interest in the market for sure. The wing is essentially a handheld sail with a lightweight inflatable structure like a kite and has a rigid boom like a Windsurfing sail. It's a hybrid of Windsurfing, Kiteboarding and Foil Surfing all rolled into one

so it really crosses over into the testing we are doing across all of these sports. We are able to use our Fanatic Aero surf foils, windsurf foils and even kitesurf foils for wing Foiling together with the Sky Surf foil and Sky SUP foilboards. The wing allows you to launch in places that would be impossible to launch a kite and gives you freedom to carve and ride waves in a way not quite possible with a windsurfer or kite. It doesn't replace any of these sports, but is a great addition to your quiver of fun toys!

SURFING

13200-1101

PROWAVE LTD

7'6" / 8'0" / 8'5" / 8'9"

When it's overhead and conditions are firing – choose the ProWave – our high performance Surf SUP design that allows you to charge hard, no matter how extreme the conditions.

Whether you're carving fast powerful turns on a reef break, or slashing in the pocket and busting airs on a beach break; the ProWave offers true short board performance thanks to its super responsiveness and tons of drive.

The real surf scoop rocker line boosts acceleration, while the thin rails, nose and tail ensure ultimate control and grip for deep carves. Light, strong custom surftech construction gives the right amount of flex; the ProWave comes with 5 boxes to adapt to the conditions and your style.

13200-1100

STUBBY

7'10" / 8'3" / 8'7" / 8'10"

The Stubby is the go-to board for experienced to intermediate SUPers, who require an agile compact shape that has great stability and wave catching potential; combined with heaps of speed, flow, and radical snappy turns.

Its compact dimensions and efficient parallel outline allow the Stubby to accelerate and flow through every turn, with maximum hold from the thin rails giving instant reactive carving. The pulled in winger swallow tail and low swing weight, allow snappy carves in the pocket or break the tail free with a slashier style.

The Stubby excels when the waves are less than perfect, and will boost every session – bagging you more waves, with more speed – no matter what the conditions.

13200-1130

STUBBY AIR

8'6"

The Stubby Air is our compact inflatable wave SUP, designed for intermediate to experienced SUPers, looking for progressive and dynamic performance from a board that is incredibly convenient to store and transport.

Featuring the same efficient parallel rail concept as our composite Stubby, the Stubby Air has great hold and drive on the wave. The wide nose and double diamond tail combined with the 2+1 fin setup allow for instant reactions and fast snappy turns. Produced in our high tech Double Layer Light technology with its incredible stiffness / weight ratio, never has so much fun been packed into a compact backpack!

13200-1102

ALLWAVE

8'8" / 8'11" / 9'3" / 9'7"

The AllWave is designed for intermediate wave SUPers looking for a stable and easy paddling board to catch wave after wave, whether it's clean overhead walls, or small and choppy.

This year we made marked advances to the shape – that when combined – significantly enhance the stability and paddling, while at the same time increase manoeuvrability and waveriding performance.

A slightly straighter narrower outline overall, mixed with increased volume & thinner rails; allows the AllWave to sit deeper in the water, making it more stable at low speeds and also increasing acceleration and hold on the wave face. The final addition – a new winger tail – boosted the turning ability, and makes the board feel much more agile, sporty, and smaller underfoot than it actually is.

13200-1104

STYLEMASTER

10'0" x 28.5" / 10'0" x 30.5"

Inspired by classic longboard style Surfing, the beautiful Stylemaster Bamboo is our nose-rider SUP, allowing you to express your style on the wave with your toes hanging loose!

Easy to paddle with insane glide, the classic outline means that no board is more efficient at catching waves. The wide nose with high apex rails makes nose-riding a breeze, and we refined the rocker-line to allow the Stylemaster to ride much faster with endless flow on the face. This also produced a super smooth, gradual increase in turn-ability when stepping back towards the tail, where the thin surf rails will give great bite for more aggressive carving.

FLY

9'6" / 10'6" / 11'2" / 11'2" CF

The Fly is the definitive all-round paddleboard range; having the versatility to smoothly glide across flat water, effortlessly ride small to medium sized waves, and even the option to add a sail and windsurf in light winds.

Designed to cater for all experience levels – whether you are a newbie or more experienced paddler – these classic SUP shapes will provide you with the maximum enjoyment from your time on the water, no matter where you paddle.

Built in light and strong Vectornet technology, the Fly is available in three sizes, with the 11'2" also available as a model with optional Center Fin, for better stability and tracking when using for Windsurfing.

13200-1119

FLY ECO

9'6" / 10'6"

The Fly Eco is the flagship of our Ocean Minded spirit – built with eco-friendly Flax, Cork & Wood Veneer (instead of classic glass and PVC sandwich) – and like all our boards, uses plant based Bio Resin.

It not only shows what is possible in terms of replacing oil-based materials with sustainable organic elements, it also rides great and looks stunning! Graphics are kept to a minimum to let its inner beauty shine through.

Available in two sizes, the Fly Eco is an all-round SUP board with a unique flex that creates a fun responsive feeling beneath your feet. It rides exceptionally, while having a construction that minimises impact on the environment.

13200-1106

FLY SOFT TOP

10'6" / 11'2"

For a smooth entry into the world of SUP, the Fly Soft Top is the perfect all-round Stand Up Paddleboard. Its classic shape provides effortless glide across flat water, and easy Surfing in small to mid-sized waves.

Both the popular 10'6" and our super stable and floaty 11'2", are available in our gentle yet robust Soft Top technology. Designed to cater for the widest range of rider ability, these boards offer pure fun no matter if it is your first time on a board, or you are an experienced paddler. Both sizes also come with a mastfoot insert, to attach a Windsurfing sail.

13200-1132 (PREMIUM) | 13200-1131

FLY AIR

9'8" / 10'4" / 10'8"

The Fly Air is the all-round inflatable SUP that everyone can enjoy. Our easy and stable all-rounder is the perfect solution if you are looking for a classic board that can perform in everything from flatwater to small waves.

Highly portable, strong, stiff and durable, the Fly Air is the convenient answer to limited storage, city life and travellers' demands. With a great mix of glide, stability and all terrain versatility, the all-round outline and generous volume cater for those looking for an easy ride; while the side fins give great bite when riding small waves.

Available in three sizes and two constructions. The Fly Air Premium boasts the best inflatable construction available on the market (DL Light), with an incredible stiffness/weight ratio, the Fly Air comes in a lightweight Drop Stitch construction.

13200-1138

RIPPER AIR

7'10"

Our kids inflatable SUPs match the strength and size of the next generation perfectly. Light, strong and with easy handling, the ultimate fun package that they can carry to the water themselves on their bike or skateboard, and set up easily.

The 7'10" Ripper Air is the soft and playful all-rounder, designed for easy action on flat water, or riding small waves for the first time. Stable and easy handling, its innovative design makes it especially user-friendly, maximum fun is guaranteed!

EXPLORING SARDINIA

WITH MANUELA JUNGO & VICTOR FERNANDEZ

MANUELA JUNGO AND VICTOR FERNANDEZ FOUND THEIR ROAD TRIP PARADISE ON THE ITALIAN ISLAND SARDINIA, BECAUSE OF THE AMAZING STAND UP PADDLE SPOTS, BEAUTIFUL NATURE, GOOD FOOD AND COLOURFUL SUNSETS.

A PLACE POSSIBLY STILL UNDER THE RADAR AS A PADDLE SPOT TO GO DURING THE SUMMER, SARDINIA COMES HIGH ON THE LIST OF OUR FAVOURITE ONES AND WITH THE PROMISE OF WARM WATER, BEAUTIFUL SCENERY AND SOME OF THE FINEST FOOD ON THE PLANET IT IS WORTH CHECKING OUT.

Sardinia is an island in the Mediterranean between Italy, Spain, Tunisia and is south of Corsica. The Island offers beautiful white sand beaches, crystal clear water and amazing coastal drives. Sardinia is also constantly hit by swells, which makes it ideal for those in search of wave Stand Up Paddle havens.

Sardinia was love at first sight for us; we really enjoy the nice people, perfect conditions and Italian food. We normally try to stay away from touristy places and go in search of quiet, friendly spots. It is also a great place for us to find a quiet beach to stay overnight with our

Mercedes Marco Polo van, go running, train and practice yoga.

There are many Stand Up Paddle spots all over Sardinia, but the west and south have the pick of the bunch for us because we also like to Kitesurf and Windsurf in the afternoon. You have a vast choice of amazing beaches and bays to explore. You can go on beautiful flatwater tours and the coast offers easy wave conditions. Yes, the sand really is that white and the sea the bluest blue. Our favourite spots are as follows.

It is the ideal beach for those who want to have an authentic experience in direct contact with nature, with no restaurants or cafés on the beach. Only the relaxing sound of the waves, the golden beach, the densely growing evergreen shrubs around the sandstone cliff reflecting in the clear sea water. The underground is sandy and the waves are good for beginners and intermediate riders.

The beach Porto Pino has a length of 4 kilometers and is characterized by majestic sand dunes. The sea at Porto Pino beach is crystal clear and shallow and sheltered from the wind. The best place to start your tour is in the village, where you can park and enter the sea through the boat channel. You can keep going to the right and explore the coast and jump from the cliffs or paddle along the beautiful beach.

DIAMOND
 9'6" / 10'6"

With smooth paddling and effortless glide, the Diamond shines bright with limitless all-round capabilities and performance. Cruising on flat water is a pleasure with our ladies SUP, and catching small to mid sized waves is easy and fun.

A perfect compliment to our timeless Fly range, the women specific design is brought to life with stylish graphics and colours. A well-balanced and wide volume distribution caters for easy movement on the deluxe deck pad, while carving is smooth and direct thanks to the thin rails and classic longboard shape. Available in two sizes, the classic 9'6" and the most accessible Diamond you'll find, our 10'6".

13200-1133

DIAMOND AIR
 9'8" / 10'4"

Designed for all levels of female SUPer looking for a ladies specific board that is easy to use and transport; and performs well in everything from flatwater to small waves.

Available in 9'8" or 10'4", the lightweight Diamond Air range offer exceptional glide, stability and easy paddling. With a classic longboard outline and packed with volume for a stable stance; they feel just as at home exploring along the coastline or a river, as they are catching small surf at your local break.

Simplicity is key, with lightweight DS Light Tech construction, they are easy to stow away and transport, ready for your next session.

13200-1115

DIAMOND TOURING
 12'6" x 28.5"

Designed for entry to intermediate female SUPers who like to explore – whether it's miles of coastline, lakes, channels or rivers – the Diamond Touring glides effortlessly into new territories with stability and ease.

Benefiting from the development of our raceboards, the Diamond Touring allows you to cover distance with minimum effort and maximum glide, thanks to a highly efficient rocker line based on the Strike. Exceptionally stable, the comfortable recessed deck; wide tail and high apex rails make tracking perfect in both flat water and chop.

13200-1136

DIAMOND AIR TOURING
 11'6" x 31"

The 2020 Diamond Air is designed for all levels of female Touring and Trekking enthusiasts; who are looking for a ladies specific board that delivers great straight line performance with convenient travel & storage.

Based on the same classic sleek outline of our 11'6" Ray Air, the Diamond touring offers exceptional glide, allowing you to effortlessly cover distance over calm waters. The generous volume and rigidity ensure a comfortable stable stance and easy paddling; while the single deck net will keep all your baggage high and dry until you reach your destination.

Built from our tough but light Drop Stitch Light technology, the Diamond Touring is easy to transport, set up and stow away until your next adventure.

LADIES COLLECTION

SHINE BRIGHT LIKE A DIAMOND

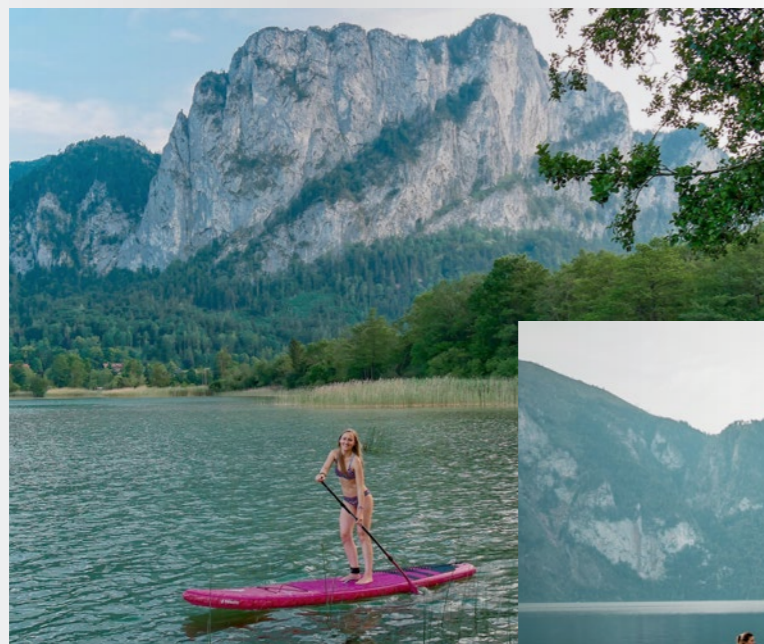

Over the years, SUP has given an exciting new lease of life to people of all ages worldwide. Through learning a new sport, embracing new trends or straight up shredding, there's no doubt that this sport-for-all creates a sense of empowerment, motivation and strength. The female community has been making a serious impression on the industry, taking to the ocean, charging waves, leading the 'workout on water' trend and winning races across the globe.

As a brand we embrace the stoke and demands that our customers want from our products, and endeavour to further fuel the passion. Working hard to create the most inclusive and progressive women specific boards, our line of Diamonds are designed to cover all styles and demands of the female rider.

INSPIRING WATER-WOMEN MARÍA ANDRÉS, HAS FOUND HER OWN SPECIAL CONNECTION WITH SUP AND IS CONSTANTLY SURPRISED WITH EACH EXPERIENCE IT GIVES HER:

"SUP has changed the way I enjoy the ocean. As a Windsurfer and Surfer I've always played in rougher environments, which I love! SUP has definitely connected me with the ocean in a deeper and more complete way. It doesn't take long to gain confidence on a SUP board and now when the waves are big I don't hold back. It's also super fun to take a bigger board when the waves are tiny and get out there. Between Windsurfing and SUP I get on the water 365 days of the year. What more can a girl want?"

FOR MORE THAN TWO YEARS NOW, JULIA KAFFKA AND ANJA MÖRK (AKA "GIRLS ON SUPS") HAVE BEEN TRAVELLING TOGETHER AS "GIRLS ON SUPS" IN BAVARIA AND AROUND THE GLOBE AND ARE ALREADY TAKING OVER 20 000 FOLLOWERS ON INSTAGRAM ON THEIR SUP ADVENTURES. WHENEVER THEY CAN, THEIR INFLATABLE BOARDS ARE PACKED AND THEY ARE HEADING FOR MOUNTAIN LAKES:

"The Diamond Air Touring is definitely one of our favorite boards ever. It's perfect for long tours, choppy waters, relaxing on the lake and you can even catch some baby waves with it."

COLLEEN CARROLL IS A KITEBOARDING PRO FROM THE USA AND LOVES TO EXPLORE THE OREGON AREA WITH HER DIAMOND AIR:

"Stand Up Paddleboarding in Oregon where I live is so much fun! Whether enjoying the grand views of the mountains, heading out early to find the river otters at the lake or practicing yoga on water, the Diamond Air is my perfect companion – I always have it in my car, ready to go!"

PAULINA HERPEL IS A SUP PRO RIDER AND NORMALLY TRAINS ON HER PROWAVE AND BLITZ OR STRIKE, BUT SHE ALSO ESPECIALLY LOVES HER DIAMOND BOARDS:

"When I am travelling to wave spots or adventure trips, I always take my Diamond Air Touring with me. I just love the look and the easy cruising. Sometimes I go for a quick paddle with it in Hamburg city as its just much easier to transport than my bulky raceboards. At the Bavarian lakes I also love to cruise with the Diamond Touring. I just love its sparkling style on the turquoise waters!"

MANUELA JUNGO IS A PROFESSIONAL KITEBOARDER AND ADVENTURE TRAVELLER FROM SWITZERLAND. SHE TAKES HER DIAMOND AIR WHEREVER SHE CAN:

"The Diamond Air is the perfect companion for windless moments and I always try to take it with me on my kite trips for windless days. It's easy to carry, quickly pumped up and I can use it for fitness or just to cruise around and explore new beaches or enjoy the sunset. At my home country Switzerland we do have a lot of mountain lakes which are perfect for touring and exploring. I would never want to miss my Diamond Air here again."

RAY
 12'6" × 28.5"

Designed for those who want to get away from it all – whether it's exploring miles of coastline, lakes, channels or rivers – the Ray glides effortlessly into new territories with an uninterrupted paddle stroke.

Benefiting from the development of our raceboards, the 2020 Ray allows you to cover maximum distance with minimum effort, thanks to a highly efficient rocker line based on the Strike. The slightly recessed deck, wide tail and high apex rails maintain the super stable ride, allowing you to track easily in both flat water and chop. One shape (12'6" × 28.5") is available in two construction options to suit all riders and budgets.

13200-1135 (PREMIUM) | 13200-1134 (PURE)

RAY AIR
 11'6" × 31" / 12'6" × 32"

The Ray Air is our inflatable touring SUP that has sleek lines and immense glide, making it the ideal partner for exploring miles of coastline, lakes, channels or rivers.

Its generous volume and maximised waterline combine stability and straight-line performance, while the optimised thickness offers great rigidity for effortless paddling.

Both boards are available in two construction options to suit your budget, with the Premium version offering upgrades such as industry leading DL Light technology, Fanatic Click Fin, wheely Backpack and a mastfoot insert for Windsurfing.

13200-1135

RAY AIR PREMIUM
 13'6" × 35"

New for 2020, we expanded the range (11'6" & 12'6") with a larger 13'6" option (Premium technology only). Its high volume is ideal for both bigger riders, and those looking to do longer tours with more baggage on board.

The Ray Air Premium 13'6" is available in the industry leading DL Light technology, with a Fanatic Click Fin, wheely Backpack and a mastfoot insert for Windsurfing.

13200-1140

RIPPER AIR TOURING
 10'0"

Our kids inflatable SUPs match the strength and size of the next generation perfectly. Light, strong and with easy handling, the ultimate fun package that they can carry to the water themselves on their bike or skateboard, and set up easily.

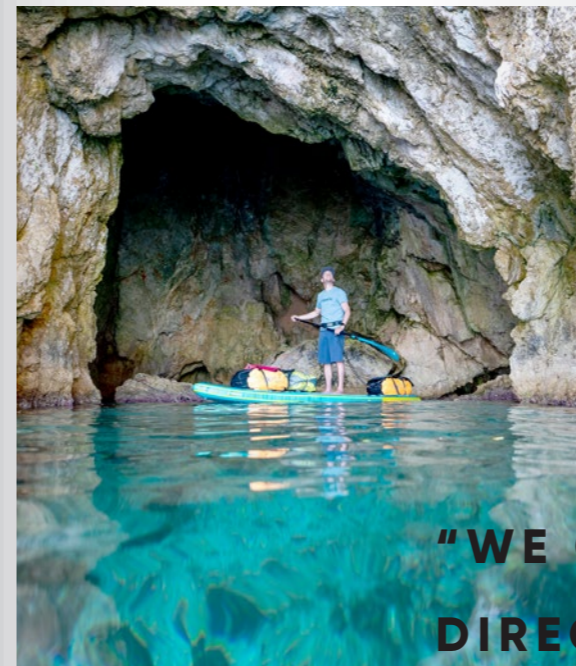

The Ripper Air Touring boasts the ideal dimensions to ensure that kids of all levels will be faster than their buddies & parents on longer adventures. The racy outline ensures that they can paddle efficiently and track well, no matter the distance.

DIAMOND TOURING LADIES MODELS!

ON A MAGIC CARPET THROUGH GREECE

COPY: THOMAS OSCHWALD
RIDERS: THOMAS OSCHWALD & BETTINA MARTI

**"WE CANNOT
DIRECT THE WIND
BUT WE CAN
ADJUST THE SAILS."**

ARISTOTELES, GREEK PHILOSOPHER

Glistening crystals of light dance upon the azure water. Gnarled olive trees provide shade for the pristine sandy beaches. Enormous marble columns protrude into the sky – contemporary witnesses to ages long past. Breathtaking mountain panoramas stretch magically over the broad countryside. A farmer on his donkey whistles happily on his way home. Then, suddenly, a plane, with engines roaring, prepares to land. Hundreds of tourists pour out of its belly. The dream disappears. But I climb on my "Magic Carpet" and immerse myself in the hidden Greece with all of its empty beaches and coastlines.

Greece has long belonged to the biggest travel hot spots for those looking for relaxing and entertaining beach vacations. It is mainly the Greek islands that fascinate travelers year over year. It is a fascination that I, as an adventurer, can only minimally share. Beaches and coves plastered with rows of umbrellas and crowded bars, souvenir shops and restaurants show even the biggest dreamer that tourism reigns here in this country. It is a trend that will not be stopped and many sun-seeking tourists love it. For my partner Bettina and I, the tumultuous crowds were the reason for us to adjust the sails. >

56

We asked ourselves what Greece was like back when Aristoteles searched for the meaning of life and being?

**"IT IS NOT
BECAUSE
THINGS ARE
DIFFICULT
THAT WE DO
NOT DARE. IT
IS BECAUSE
WE DO NOT
DARE THAT
THINGS ARE
DIFFICULT."**

SOKRATES
GREEK PHILOSOPHER

Straight to the point: We found it. Our gamble to discover Greece on our own with our Stand Up Paddleboards paid off and was a great success. Breathtaking cliffs let us feel small and fragile. Crystal clear water exposed new worlds deep beneath our SUPs. The fresh and healthy mediterranean cuisine charmed our taste buds. Empty coves and beaches were found far away from the sun-seeking masses and thundering party music. Greece showed us its most beautiful side and we could only begin to fathom how wild and pristine this land once was and partly still is.

But it was a difficult path. It was no easy task fleeing from all the tourism. We could easily spot the distant beaches that were easily accessible by car due to the rows upon rows of permanent umbrellas. But the idea that the beaches one couldn't drive to would be empty turned out to be quite wrong as we saw a party boat anchoring in a beautiful cove. But as the saying goes: The magic is always in the detail. And so, we could often immerse ourselves in the untouched beauty of Greece just a few hundred meters away from the tourist hot spots.

"As a Natural Being, Man is bound to his Body. As a spiritual Being, however, he has Wings."

PLATO, GREEK PHILOSOPHER

Tourism, however, does have its advantages. We never had to carry much on supplies or lots of water with us, for example. We could always restock on food and provisions at a restaurant or near fishing village. We learned to appreciate that both worlds have their benefits. The knowledge of this lent our spirits the wings to discover and absorb the beauty of this country.

Afterer three weeks, we came to the decision that an untouched pristine Greece does still exist. Not to be found on every corner as it was hundreds of years ago, maybe, but hidden in small fishing villages, secluded coves and elevated olive groves. Whether fully packed with supplies and provisions for many weeks or with a inflatable SUP spontaneous short trips, those who want to discover Greece off the tourist paths, can find that a SUP board supplies the perfect "Magic Carpet" for big and small adventures.

DOWNWIND RACE

FALCON CARBON / FALCON AIR

ALLROUND RACE

BLITZ CARBON / BLITZ

FLATWATER RACE

STRIKE CARBON / STRIKE

RACE

13200-1111

FALCON

14'0" x 24" / 14'0" x 26"

13200-1137

FALCON AIR

12'6" x 26.5" / 12'6" x 29" / 14'0" x 26.5" / 14'0" x 29"

Everything about the Falcon – our downwind race specialist – is about combining incredible Surfing speed with a supreme level of efficiency, control and stability to get you across the finish line ahead of the pack – every time.

An evolution based on the boards that helped Arthur Arutkin become 2018 APP World Champion; we made significant advances to the design and performance by borrowing DNA from the Blitz. Slightly narrower overall, a straighter outline increases top-speed on flat water; yet – stability and control are still exceptional – thanks to alterations in the deck shape, rocker line, and volume distribution throughout the nose and tail.

In the surf, you can effortlessly catch waves and maintain high speed gliding; and thanks to the refinements in the shape, kick turns are also easier, especially for lighter riders.

The Falcon Air inflatable raceboards are designed for intermediate to experienced paddlers who want to focus on paddling speed, training & covering long distances; but want to avoid the hassle of transport, storage & handling that comes with a composite raceboards.

All four sizes of our lightweight race traveller have a new more performance-orientated shape, with a narrower tail – featuring silicone rail edges – to increase top speed and maximise gliding efficiency. The generous flotation and ultra stiff, lightweight Double Layer Premium technology ensures they are rigid and direct on the water, with a super stable stance. Ideal for either flat water or down-winders on open-ocean, they are ready to race!

13200-1120 (CCS) | 13200-1124 (BXF)

BLITZ

14'0" x 23.5" / 14'0" x 25.5"

Combining design cues from the Falcon and Strike, the Blitz is our all-round race machine that will get you to the finish line first – no matter what the conditions!

Unfazed by aggressive chop, padding in huge surf, or sprinting for the finish on flat water; the Blitz inspires confidence and excels when the going gets tough.

Its design is an evolution of the favourite boards of our 2018 APP World Champion Arthur Arutkin. Just like its race siblings, we reduced the width to improve speed and acceleration without losing stability. A straighter outline, pointier nose and rounder bottom shape further help control in choppy conditions or during drafting. Meanwhile, a slightly wider tail gives increased stability during turns and while stepping back during downwind runs.

13200-1112 (CCS) | 13200-1125 (BXF)

STRIKE

14'0" x 21.5" / 14'0" x 25"

The Strike is our out-and-out speed machine, designed with only one purpose in mind: putting you on the top of the podium. The Strike is based on the boards that helped Arthur Arutkin become 2018 APP World Champion. The sleek, efficient design is quite simply the fastest board you can paddle on flat water.

This is achieved by combining generous nose volume & a narrow race outline, with a unique bottom shape – double concave up front blending to deep mono concave – which delivers smooth efficient gliding, tracking and stability. Subtle volume distribution and the recessed deck keeps the rider low, while the wider tail profile further boosts stability and ensures performance in chop and messy water conditions in experienced hands.

VIPER AIR
11'0" (355l)

The Viper Air WS is the most versatile entry-level inflatable Windsurf / SUP board ever. The ideal watersports toy, it offers two sports in one for the whole family, schools or clubs.

Offering the same great qualities as its composite sibling – stable, great non-planing tracking and glide, excellent turning potential and all-round manoeuvrability – learning Stand Up Paddleboarding or Windsurfing couldn't be easier.

The soft deck pad and inflatable construction makes the Viper Air WS forgiving and offers unlimited fun, whether Windsurfing, SUPing, catching small waves or just floating in the sun. Storage and transporting are easy in either construction options, with the whole package conveniently fitting into a backpack ready for the next session.

13200-1147

RIPPER AIR WS
9'0" (187l)

The Ripper Air is our all-round inflatable kids Windsurf / SUP board that is ideal for them to transport, and set up for themselves. It opens up a whole world of watersports adventures and fun possibilities.

Built in our lightweight and value-minded Drop Stitch Light technology, the soft deck on the Ripper Air WS is gentle on the knees and elbows – and thanks to the generous volume and versatile shape – it offers great glide and stability at low speeds for easy Windsurfing or Stand Up Paddleboarding.

The perfect family toy, the Ripper Air is supplied with two fins – use both for Windsurfing, or just the rear fin for SUP fun.

13200-1810

RIDE SUP RIG
4.5 m² / 5.5 m² / 6.5 m²

Sizing	4.5 m²	5.5 m²	6.5 m²
Mast length	415 cm	435 cm	475 cm

FIT

13200-1152

FLY AIR FIT
 10'6" × 34"

The Fly Air Fit provides a moving platform for a new, intense and exciting way of balance training. If it's yoga, press-ups, squats or paddle training, each and every one of your muscles will be engaged as you increase strength, core stability and coordination.

Power and confidence will progress quicker than through any traditional fitness methods – not to mention the added benefits and stress-busting sensations of being out there in nature.

Ideal for combining SUP with SUP Fitness or SUP Yoga, the Fly Air Fit is packed with volume to keep you high and dry during workouts on the soft comfortable deck; while the stretched outline offers great all-round paddling with superb glide and stability for classic SUP cruising.

Enjoy the stress-busting benefits of outdoor workouts, and sharing the experience even further with your training partners through multiple eyelets, or attaching your board to one of our complimentary Fly Air Fit Platforms (small and normal size).

13200-1153

AIR MAT
 8'2" × 36" (343l)

Completing our range of SUP Fit and SUP Yoga products, the Air Mat provides a moving platform for a new, intense and exciting way of balance training. Perfectly sized for indoor or outdoor pools, you can take your workout to the water all year round.

With its generous volume, dimensions and comfortable soft deck – the Air Mat is specifically designed to keep you high and dry during your workout – while taking up minimal space. If it's yoga, press-ups, squats or headstands – the Air Mat is the ultimate balancing platform for a full body workout to increase strength, core stability, improved proprioception and coordination.

13200-1142

FLY AIR FIT PLATFORM
 10'0" × 10'0" (1000l)

The Fly Air Fit Platform is designed to compliment our Fly Air Fit inflatable board and create the ideal Fitness Island for an entire SUP Fit Yoga or SUP Fit class.

With 8 docking stations, the Fly Air Fit Platform is the ultimate podium for those who want to take their workout to the water. Packed with volume, stability and built to last; it acts as the ideal base for SUP schools, fitness centres, hotels or bigger indoor / outdoor pools. Thanks to the unique design, all 8 boards point towards the platform to help share the connection with your training partners; and are secured via multiple connection eyelets.

13200-1141

FLY AIR FIT PLATFORM S
 9'2" × 44" (410l)

Despite its smaller size, the new Fly Air Fit Platform S is designed to accommodate up to 10 boards in total; making it the ideal docking station for fitness and yoga enthusiasts who may change locations frequently, or are limited by space.

More versatile and smaller than its sibling, the Fit Platform S requires less space and is easier to transport than the existing platform, therefore it is perfect for smaller pools or bodies of water. At the same time, its unique design can act as the perfect match for up to 10 SUP boards, so that your friends or class can enjoy their workout in the largest group possible.

Namaste on the water

Water is the driving force of all nature and nowhere is this more apparent than on a SUP. Nothing quite beats filling your lungs with the fresh air and taking a moment to really look around, relishing in the health and wellbeing powers that we can take from our surroundings. It's invigorating, revitalizing and absolutely within your reach.

Over the past seasons, we've worked to create the most thought out, innovative and functional SUP Fit range ready for all your fitness needs; after all, who needs a gym when you can take your practice passion onto the water? Urbanites will revel in the inflatable, easy-to-transport Fly Air Fit. Instructors can lead a class from our Inflatable platform, perfect for attaching your groups and providing a stable and secure docking spot. You name it we've thought about every possible design feature to keep your gear safe and mind at ease so you can focus at the task in hand. From stretching to strengthening, fitness on water is the quickest way to improve your overall condition and above all it is a lot of fun.

One form of movement that's really come into its own on a SUP is Yoga. A favorite amongst elite athletes and mere mortals, it collects the mind, body and soul, injecting them with a certain 'je ne sais quoi' that keeps us coming back for more.

Take your Fitness or Yoga session to the water with our Fly Air Fit 10'6". Its generous volume, larger dimensions and super comfortable deck create the perfect stable platform for a unique workout on any flat water or pool. If you fancy sharing the experience with up to 8 friends, connect to the Fly Air Fit Platform. Multiple high-quality eyelets create a solid and secure connection – ideal for groups or classes. New for 2020 is the Fly Air Fit Platform Small – which despite its size – can accommodate 10 boards in total in a smaller space, while being portable and easier to transport.

Rounding off our range, the compact Air Mat is ideal for smaller pools.

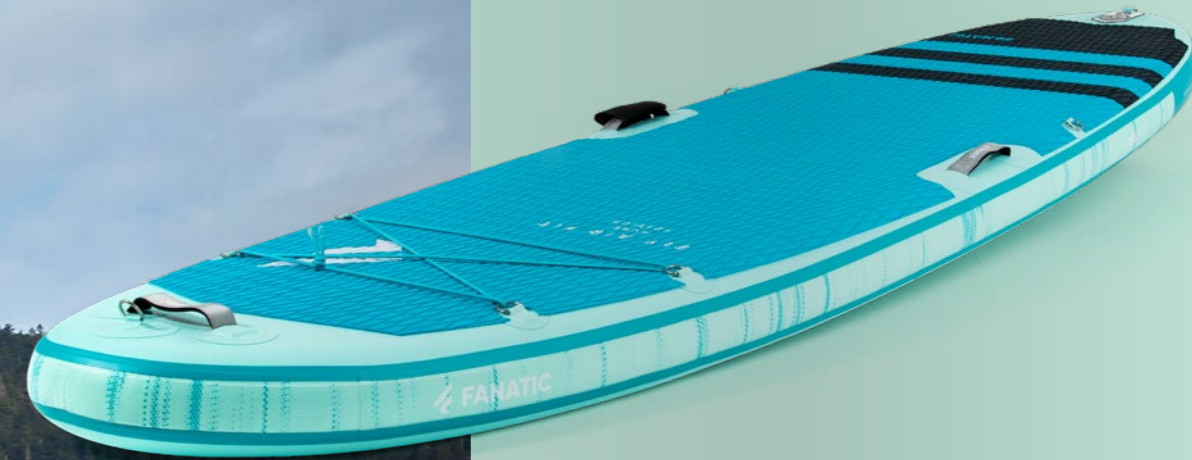

JULIA HOFGARTNER, DANIQUE VAN OOSTERHOUT, DANIELA HEISS, THERESA BRACKMANN, GINA WEBER, LUCIA LIENCRES

JULIA HOFGARTNER TEACHES YOGA AND SUP YOGA CLASSES IN VIENNA. SHE LOVES THE WATER AND BEING OUTSIDE IN THE NATURE.

"My first SUP Yoga lesson ever was in Gili Trawangan – Indonesia. I had never heard about SUP Yoga and it was all new to me. I fell in love with it from the get-go and that's why I will never forget that experience. I'm a huge fan of the Fanatic Fly Air Fit and Fly Air Fit Platform. It's very important that you have a place where you can fix the boards, giving me the possibility to lead the class where everyone has a clear view. SUP Yoga is for everyone. People who are new to yoga can start with an easy lesson. People who already have a lot of experience with yoga can take their practice to a new level. It allows for more challenging postures and really tests your balance!"

@yogaandjuliet
@supyoga.at

76

JULIA'S TOP 5 BENEFITS TO SUP YOGA:

YOU ARE FORCED TO BE PRESENT

Getting lost in your thoughts isn't possible in a SUP Yoga session. You are going to be present and completely in the moment, because you don't want to fall off your board. You definitely will have to be more focussed than during a normal yoga class.

YOU MOVE IN THE FRESH AIR AND NATURE

One of my favorite reasons. Surrounded by nature and a beautiful scenery yoga is a lot more fun. You never know what to expect. Perhaps you may spot animals during your yoga lesson next to you, wind and waves surprise you or you find yourself right in the middle of a fantastic sunset. Every lesson is different and it's always a new adventure.

YOUR BALANCE WILL IMPROVE

This reason surprises you doesn't it? Maybe on your first yoga lesson on a SUP board it feels like you are completely unbalanced and you are only fighting with gravity. But actually your balance will strongly improve after every session. Try a few balance positions on land afterwards and you'll notice a major improvement!

WATER IS CALMING

Perhaps you have previously experienced the calmness that being on the water brings you. Water has a calming effect, which you will enjoy whilst doing SUP Yoga. Maybe the calmness will only come to your well being as you experience the gentle lap of waves during your Savasana.

STRONG CORE ACTIVATION

Constant attempts (perhaps un-noticed) to maintain your balance will engage your core muscles throughout your SUP Yoga practice. After your session you may notice aching muscles that normally you do not use when practising on land!

FLY AIR XL

17'0" x 60"

13200-1146

TANDEM AIR PREMIUM

16'0" x 34"

Every wave is a party wave with our Fly Air XL iSUP board – designed to take you and between 5 and 7 friends onboard – for the ultimate group and family fun! You will laugh so hard you might forget to paddle!

Made of extra-strong HD 200 technology, the Fly Air XL is perfect for a bigger group of friends, paddle groups or school classes to have fun on. Touring, racing or surfing the wave – the XL has room for any board meeting – and you can even tandem windsurf it!

Multiple soft carrying handles provide easy transport/holding on when going down a wave. Easy to inflate, stiff and stable, 2020 introduces a new shape that is more efficient to paddle.

Whether it's 'two-stroke' Windsurfing with a friend; or SUP cruising with your kids on board; it's always double the fun-factor on the Tandem Air Premium!

The ultimate play-toy for families, groups or clubs; our Inflatable Tandem is equally at home Windsurfing with two sails attached, or Stand Up Paddling on flat water. Packed with volume for stability, the soft comfortable deck has plenty of space for two people and their luggage and it glides and tracks well thanks to the elongated shape and removable centre and rear fins.

Our Double Layer HD technology creates maximum stiffness with an ideal weight/durability ratio, and multiple handles make carrying easy. For easy transportation, we've developed a premium bag for the Tandem Air, including our Fanatic Power Pump HP2 for quick and easy inflation.

PADDLES
2020

Choosing the right paddle is as important as choosing the right board. With precision and care we have designed paddles in the best materials, which are strong and light, with the perfect amount of flex to deliver maximum power while allowing you to paddle in total comfort and style. We offer the perfect choice from beginner to pro for both genders, every rider size and age. We name our paddle range according to the Carbon content, for logical choices regarding stiffness, performance and price, so you can find your perfect paddle immediately.

FANATIC ANTI TWIST SYSTEM – NOW IN ALL PADDLES!

Our new Anti Twist System, with its channel on the extension and a matching cleat system, puts an end to using additional forces whilst locking your adjustable system. It ensures that the handle and blade are always lined up correctly. Paddle with confidence – your shaft and handle won't move! Our adjustable models are now all equipped with Anti Twist System.

FANATIC UNION JOINT SYSTEM

In the past, all paddle flex patterns were made up of two parts: the blade, and the shaft. An oversized stiff joint disrupted these two flexible parts, where paddle and shaft were connected. The Fanatic Union System paddle has revolutionised the unified flex pattern. It now runs seamlessly from the tip of the blade all the way to the shaft. By moving the connection joint further up the shaft, it tapers perfectly into a RDM joint, resulting in constant flex for an unmatched spring and response with every stroke. From the moment the blade enters the water your energy is converted into forward drive. The Union paddle is available in four construction styles for a straightforward selection of paddles to match your performance and budget.

ABOUT OUR 6.75"

- 6.75" blade for reduced swing weight and better aerodynamics
- Old 8" blade
- ABS reinforcement
- Double concave surfaces for increased control and efficiency

For those paddling with a higher frequency, we offer the next step from our favoured 7.25" blade. Slight double concaves cater for a super controlled stroke with better traction and ultimately a higher efficiency. The extra powers these concaves create allow for this small blade size with better aerodynamics between the strokes and reduced swing weight compared to larger blades. The 6.75" blade is available with our performance models C100 / C80 and our Diamond ladies paddle.

13200-1300 | 13200-1301

CARBON PRO 100

6.75" / 7.25"

The Carbon Pro model comes with a super light and responsive 100 % 12 K Carbon blade. Combined with our Union paddle design and its 100 % 3 K Carbon shaft, it is strong yet one of the lightest paddles around. With a reduction in swing weight, this paddle has an ultra-fast flex response from the tip of the blade right through to the top of the handle, which also shines in precious 12K Carbon. The Carbon Pro paddle is available in both 7.25" and our 6.75" blade size. Each has an integrated ABS blade protector and is available in fixed length or adjustable shaft.

13200-1302 | 13200-1303 | 13200-1304

CARBON 80

6.75" / 7.25"

Our Carbon 80 paddle is the high-performance choice for the ambitious paddler. Top flex and response are guaranteed for effortless handling through an 80% Carbon blade with ABS blade protector and shaft plus additional Kevlar shaft webbing. Available in 7.25" and 6.75" blade size, the Union system has the most supreme flex pattern running from the top of the handle to the tip of the blade. Fixed or adjustable shaft lengths, or even an adjustable 3-piece version including a handy carry bag, you're sure to have the most effective paddle stroke on the water.

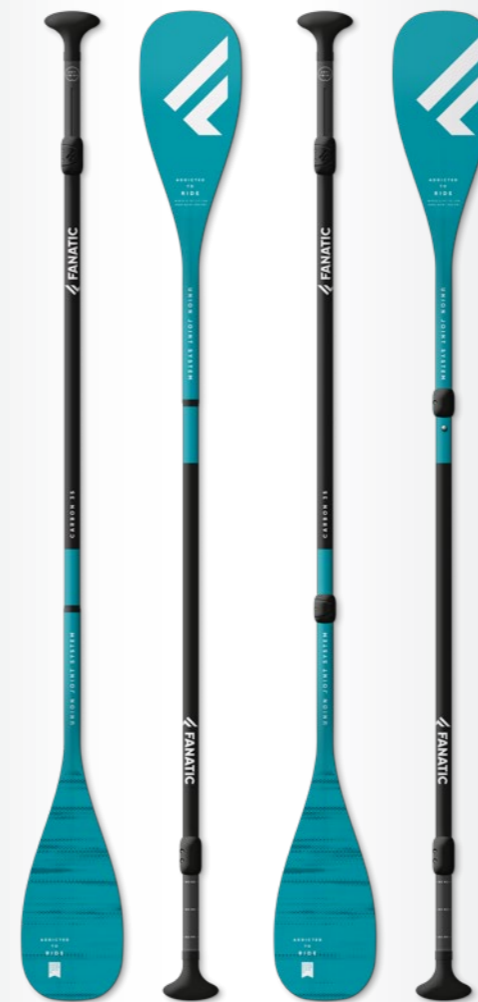

13200-1305 | 13200-1306 | 13200-1307

BAMBOO CARBON 50

7.25"

Style and performance are combined in the Bamboo Carbon 50. A 50% Carbon core covered in precious Bamboo finish leaves a great visual impact for this entry performance paddle. Benefiting from the Union Joint system, this is an outstanding construction for those starting to gain skill on a SUP. The twist and flex in the blade are superbly controlled through its design and is available with a 7.25" blade with fixed or adjustable shaft and in our handy adjustable 3-piece version.

13200-1309 | 13200-1310

CARBON 35

7.25"

Our Carbon 35 adjustable paddle with its matt finish 35% Carbon/Glass shaft and strong, ABS protected carbon composite blade is the top choice for any entry level paddler ready to go from zero to hero. With the Union Joint system and a blade size of 7.25" your strokes are highly effective. Available in standard adjustable or as 3-piece Carbon 35 adjustable for the most convenient paddle transport ever.

13200-1311 | 13200-1312

DIAMOND CARBON 35

6.75"

The perfect match for our ladies SUPs Diamond, Diamond Touring and our Diamond Air models. Adjustable to your size and style, this is the super effective yet most stylish paddle to cruise around. Built with our small 6.75" durable carbon composite blade with white ABS rail protection and a 35% Carbon shaft covered in matching graphics to our Diamond boards. Available in adjustable or 3-piece version.

13200-1340 | 13200-1341

CARBON 25

8"

Our dedicated intermediate/river paddle Carbon 25 8" has an excellent flex to weight ratio, delivering beginner and aspiring paddlers alike with all the characteristics needed to progress. The Carbon 25 is available in both 165 – 220 cm adjustable and adjustable 3-piece versions, so it can be shared amongst family and friends. The durable ABS blade is perfect for the action seeker looking to conquer wild waters of rivers and streams with the occasional bottom contact. The unique carbon look of its shaft rounds off this incredible package.

13200-1345 | 13200-1346

PURE

8"

Our Pure paddle is the perfect match for our entry level iSUPs and for anyone looking to get a good amount of bang for your buck! With its 15% Carbon/Composite shaft and solid 8" ABS blade, it's light in your hands and handles the usual contact in the early stages with ease. Our Pure paddle is available in adjustable and adjustable 3-piece version with a length of 165 – 220 cm.

13200-1322

RIPPER CARBON 25

6.5"

We understand that kids need to be encouraged and that often starts with them being comfortable with the equipment they are using. We have come up with paddles specifically designed for juniors and as the perfect partner for our Ripper Air kids iSUP boards. Our lightweight Ripper Carbon 25 comes with a unique Carbon look and our highly durable 6.5" blade to withstand the daily hits from the unavoidable learning curve. Designed to unleash the grommets playful nature and their hunger to be out there for hours without feeling tired. Adjustable from 130 – 160 cm, it just grows with them.

13200-1321

RIPPER PURE

6.5"

The Ripper Pure paddle comes with a 15% Carbon/Composite shaft and features a 6.5" ABS blade. Available as convenient 3-piece version with an adjustable range of 130 – 160 cm, it grows with your junior and fits into the backpack of our Ripper Air models. Easy, strong and value minded!

FANATIC INTERNATIONAL TEAM

TEN YEAR OLD

BOBO
GALLAGHEROUR YOUNGEST TEAM
MEMBER FROM MAUI

92

When we met ten year old Bobo and his dad Andrew for the first time during our photoshoot on Maui this spring, we could not believe how he was pumping around the lineup at Baby Beach on his SUP foilboard. The waves were small and he caught one after the other with the boundless energy that's to be expected of a kid of his age. But he had confidence in his equipment and a strength and focus that made him appear much older. Some voices say Bobo could become Maui's next big waterman. Let's stay tuned!

Bobo, what do you think of the new gear:

I love it. All my Fanatic gear is really fast. I am into design on boards and I like the logo, its simple but it's recognizable. It's cool to have people like Sky and Ken who can make a dream to reality by creating boards and foils to meet my style and for them to be right here on Maui is amazing.

You like to Surf, SUP, Surf Foil, Downwind Foil – we can see that you like to do it all! What's your most favorite style of riding these days?

Honestly, I don't really have a favorite. I kinda just choose what I am going to ride depending on conditions and occasion. One of my favorite things is to take all that I can load in my dad's car and when I get to the beach, I switch it up depending on how I feel.

2020

STAND UP PADDLING

How did you get into SUPing / Surfing / Foiling at such a young age:

I remember a Taco Tuesday hanging with our families and our friends the Claydon's lent me a SUP board. I liked that it was easier to get into the wave.

December 21st, 2017 was the day I opened my Christmas present, a new foil. I remember what I said exactly after hitting the water, "That's so cool."

I have always loved water and Maui offers the ultimate water playground.

Who do you look up to in sports?

Kai Lenny. I loved watching how he was so good at so many different disciplines. It has been really inspiring. Airtion Cozzolino, I think he's the best SUP surfer in the world. I get my drive to be like them. If they can do it, then I can do it.

What motivates you to progress in your skills on the water?

I like goals. Like setting a world record, when I completed the Maui to Molokai as the youngest person to cross the Pailolo Channel on a foil and youngest person to complete the crossing, that was pretty cool. I would like to do an ultimate crossing one day, which involves many different crossings on the islands. I want to go to the Olympics. What motivates me most and my drive is to complete these goals I have that involve a variety of water disciplines. I am having fun so that motivates me and increases my skill. I also really like meeting new people, building relationships and making connections. I also sometime motivate myself with food. If I can do a new trick, I can get a Jamba Juice (... but don't tell my dad).

You had a chance to meet some of your new team mates on a recent photo shoot in Maui, what was it like to ride and work alongside well known athletes like Arthur Arutkin, Sky Solbach and Airtion Cozzolino?

When I first showed up, some of the athletes looked at me and wondered who I was. Thankfully, Karin gave me a Fanatic shirt. They looked like, Oh okay, but still who are you?" It was funny. It was super cool to surf beside those guys. They are so good and I got in the water with them. It raises my game. I really like how they ride and their style.

What do your parents think about your competitions and long distance challenges that you do?

They are scared sharks are going to gobble me up. They are relieved when I make it and that they are super proud of me.

Bobo's parents:

Bobo chases fun, that is most of what I see. He also has this incredible energy that needs an outlet and we are so thankful he has found such a love and a way to express himself in water. I think as he grows he will be able to give us even more words to express all that he feels and experiences in the water. For now, we are glad to be along for the ride. Steering when we need, but also letting him not be so tied to the harbor. He taught us that early on that he would need room and freedom. Some days that is easier than other days. We are so proud of Bobo.

Is it hard to get your school work done and still have enough time to spend on the water?

Yes. I usually do school for several hours and then I have to wait for my dad to get off work.

TEAM

Do you have any advice for other kids who want to start Foiling but are hesitant?

Honestly, I think it's the parents who are more afraid. I think they should do it because its fun. Always wear a helmet and impact vest when trying new tricks or going at high speeds behind a boat. Use a kevlar filled paddle.

//

Sky Solbach about Bobo:

IT'S BEEN INSPIRING TO WORK WITH BOBO OVER THE PAST FEW MONTHS TUNING HIS EQUIPMENT AND WATCHING HIM EXCEL IN EVERYTHING HE DOES. HE'S VERY FOCUSED FOR HIS AGE, INCREDIBLY FIT AND APPROACHES ALL THESE NEW CHALLENGES HE'S SETTING FOR HIMSELF – LIKE OPEN HYDROFOIL CHANNEL CROSSINGS AND COMPETING IN GIANT SURF AT SUNSET BEACH – WITH A SMILE ON HIS FACE. HE'S DOING IT BECAUSE IT'S FUN AND FOR THE THRILL OF THE NEXT CHALLENGE THAT LIES AHEAD AND I BELIEVE THIS IS THE BEST POSSIBLE MINDSET ONE CAN HAVE. I'M STOKED TO HAVE HIM ON THE FANATIC TEAM AND TO HAVE THE OPPORTUNITY TO PUT HIM ON THE BEST POSSIBLE EQUIPMENT TO TACKLE HIS FUTURE ENDEAVORS.
